

Superior Data Grade Tape for Maximum Performance from Maxell

Maxell's 8mm data cartridges feature the Data 8 logo which is a trademark of Maxell and a symbol of 8mm data cartridges specifically developed for digital data storage.

Maxell offers data certified 8mm cartridges with capacities up to 14 gigabytes for high capacity data storage and library applications. Maxell uses only the finest quality magnetic media to meet the strictest specifications for a minimal dropout rate. Maxell then processes this media in a

Class 10 clean room where it is certified for data recording purposes.

Patented Ceramic Coated Metal Particle
To protect the fine metal particles in the magnetic layer of the tape, Maxell invented the ceramic coating process. Maxell's ceramic coating acts as a protective armor against heat, humidity and eventual oxidation. The result is a tape durable enough to withstand at least 2,000 passes with an archival life of up to 30 years.

PRODUCT SPECIFICATIONS

Model	HS-8/112	HS-8/160	HS-8/CL
Tape Width	8.0 mm	8.0 mm	
Tape Length	112.0 m	160.0 m	
Capacity	2.5/5.0 GB*	7.0/14.0 GB*	Up to 20 cleanings*
Recording Density	56,800 ftpi	56,800 ftpi	
Tape Speed Rating	0.43 ips*	0.43 ips*	
Nominal Coercivity	1,530 Oe	1,530 Oe	
Durability Rating	2,000 passes	2,000 passes	
Item #	186710	200910	186592
UPC Code	0-25215-18671-4	0-25215-20091-5	0-25215-18651-6
