TRAVAN MINI CARTRIDGES

Introducing Travan Mini Cartridges from Maxell...

TRAVAN™

TR-1 MINI CARTRIDGE

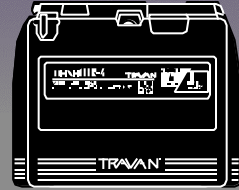

400 MB (Uncompressed)
800 MB (Compressed)

TR-3 MINI CARTRIDGE

1.6 GB (Uncompressed)
3.2 GB (Compressed)

TR-4 MINI CARTRIDGE

4 GB (Uncompressed)
8 GB (Compressed)

TECHNOLOGY

The Travan Mini Cartridge design holds a longer, wider tape that can store more data within the 3.5" form factor. It's based on proven Quarter-Inch Cartridge (QIC) technology – the preferred solution for millions of computer users around the world. Uncompressed capacities range from 400 MB on TR-1 to 4.0 GB on TR-4 giving you the capacity you need to handle the most demanding applications.

STORAGE SOLUTION

Hard drive capacities are increasing and software capabilities are expanding. Spreadsheets, word documents and multimedia presentations are taking up limited hard drive space. Maxell Travan Mini Cartridges can be used to offload files from your hard drive to free up space, create an archive for near-line storage, or download files from the Internet. In addition, Travan-compatible drives can read QIC mini cartridges so your existing backup library is still useful.

SPECIFICATIONS

Item	Maxell TR-1	Maxell TR-3	Maxell TR-4
Capacity:			
Uncompressed:	400 MB	1.6 GB	4 GB
Compressed:	800 MB	3.2 GB	8 GB
Data Transfer Rate*:			
Min.:	62.5 KBytes/second	125 KBytes/second	567 KBytes/second
Max.:	125 KBytes/second	250 KBytes/second	
Tape Length:	750 ft.	750 ft	740 ft.
Tape Width:	.315 in.	.315 in.	.315in.
Tape Coercivity:	550 Oe	900 Oe	900 Oe
Tracks:	36	50	72
Data Density:	14,700 ftpi	44,250 ftpi	50,800 ftpi
Drive Interface:	Floppy	Floppy	SCSI/E-IDE
Backward Compatibility:	QIC-80 (read/write) QIC-40 (read only)	QIC-3020/3010 (read/write) QIC-80 (read only)	QIC-3080/3095 (read/write) QIC-3020 (read only)
